

## Post-doc position in Psycho-Oncology

### Job Profile

**CSS** **CSS2 Cancérologie et CSS4 Neurosciences**

#### Offer description

The ESTER team is the 10<sup>th</sup> team of IRSET (Institut de Recherche en Santé, Environnement et Travail) and is specialized in the field of occupational health including skills in public health, epidemiology, ergonomics and health psychology.

ESTER has obtained, for the second time in a row, a SIRIC label (SIRIC ILIAD Nantes - Angers consortium) whose overall objective is to develop translational research in adult cancer. ESTER is particularly specialized in the issues of return to work and job retention of breast cancer survivors, and multiple myeloma survivors.

For the new labeling of the SIRIC ILIAD, we wish to reinforce our team with a post-doctoral researcher in psycho-oncology and/or health psychology. The missions entrusted to the successful candidate will be varied and will be part of a multidisciplinary consortium. The candidate will have to demonstrate a great deal of autonomy and organization of his/her working time.

#### Researcher profiles

- X First-Stage Researcher (*PhD candidate*)
- X Recognized Researcher (*with less than 4 years research experience after PhD*)
- Established Researcher (*with more than 4 years research experience*)
- Leading Researcher

#### Research Fields (2 max.)

- |  |   |
|--|---|
| <input type="checkbox"/> Biological Sciences       | <input type="checkbox"/> Medical Sciences         |
| <input type="checkbox"/> Chemistry                 | <input type="checkbox"/> Neurosciences            |
| <input type="checkbox"/> Computer Science          | <input type="checkbox"/> Pharmacological Sciences |
| <input type="checkbox"/> Engineering               | <input type="checkbox"/> Physics                  |
| <input type="checkbox"/> Environmental Science     | <input type="checkbox"/> Technology               |
| <input type="checkbox"/> Ethics in Health Sciences | X Other: Humanities and Social Sciences           |

#### Main Activities

- Systematic literature reviews
- Quantitative research interviews
- Qualitative research interviews
- Data analysis (qualitative analysis principally)
- Writing of scientific articles

#### Associated Activities
